EDUCATION

KLE Dr MSSCET College

Eelectronics and Communication B.E

CGPA: 8.1

Belgavi, Karnataka

December 2020 - May 2024

EXPERIENCE

ISTRAC ISRO | Contract Software Engineer

Bengaluru | November 2024 - Present

- Developed an intuitive and responsive user interface for the ground station software using React, significantly enhancing the user experience for mission operators through clear data visualization and efficient interaction flows.
- Designed and implemented RESTful backend APIs using Node.js to support real-time data retrieval and system control, ensuring smooth and reliable communication between the frontend interface and ground station systems.
- Played a key role in mission operations for the SPADEX Mission, ensuring seamless execution and real-time monitoring of critical tasks.
- Built Python automation scripts to streamline and automate file transfer processes, leading to a substantial reduction in manual effort and improved system efficiency and reliability

Granite River Labs | Intern

Bengaluru | August 2024 - November 2024

I interned as an IoT Software Tester at Granite River Labs, where I focused on testing IoT applications and systems using Python. My role involved developing and executing test cases, analyzing test results, and ensuring software quality in IoT environments

SKILLS

Programming Languages: C, Java, Python, JavaScript(Basics), Bash
Libraries/Frameworks: HTML5, CSS3, Spring Boot(Basics), React, Node.js
Tools / Platforms: Eclipse, VS Code, Jupyter, IntelliJ
Databases: MySQL

PROJECTS / OPEN-SOURCE

Designed and development Billing System using Java and Swing GUI components and JDBC Java, MySQL , JDBC

Development of a billing system using Java JDBC and Swing, orchestrating the design, and Implementation. This project underscores my proficiency in Java programming, database management, and graphical user interface design.

VTU CGPA and SGPA Calculator with MySQL Integration

Python ,Tkinter,MySQL

Developed a CGPA and SGPA calculator for VTU students using Python and Tkinter for the graphical user interface. The application allows users to calculate their Cumulative Grade Point Average (CGPA) and Semester Grade Point Average (SGPA) based on their grades. Integrated MySQL database for storing user data

Social Distancing Using Ultrasonic Sensor With Lcd Display

C , Arduino

Using Arduino and an ultrasonic sensor, which transmits ultrasonic waves from one point and receives them at another point. Once the distance of an object crosses the given limit, an alert message is displayed.

CERTIFICATIONS

- Java Full Stack Intern - KodNest.
- Problem Solving Through C programming - NPTEL.
- Basics of Python - Infosys Springboard.
- HTML - Great Learning.

HONORS & AWARDS

- Dance Club Secretary in my college
- District-level Badminton player
- Achieved 45,000 subscribers on YouTube
